

Smart buildings

Sustainability through innovation and technology

In today's dynamic technical landscape, Predictive Maintenance stands as a cornerstone term within the industry. The ability to schedule maintenance precisely when needed is a game-changer. And now, IMBuildings is proud to introduce Predictive Measurement. An innovative solution that harnesses the power of data analysis to foresee the impact of human activity on the environment.

Imagine a world where temperature, air quality, cleaning schedules and room occupancy are all seamlessly optimised to create the ideal conditions within your buildings. That's precisely what IMBuildings' cutting-edge solutions offer – uninterrupted, peak performance in your facilities.

Our state-of-the-art sensors, capable of counting people and measuring critical variables like temperature, humidity, and CO2 levels, empower your management team with invaluable insights. These insights not only identify potential cost-saving opportunities but also guide you in preventing unnecessary energy waste.

Our People Counters meticulously track foot traffic in every passageway, providing the data you need to make informed decisions about how to optimise your building or room usage. Want to know how many people are in a room at any given moment? Our sensors will give you the required data.

IMBuildings' sensors are the key to unlocking the full potential of your space. They ensure that every inch of your facility is utilized with utmost efficiency, allowing you to make the most of all available rooms. Don't miss the opportunity to elevate your building management to a whole new level with IMBuildings' Predictive Measurement technology.
